### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of claims 1-17 is the inclusion of a power-requiring unit that can be attached to a main body of an image forming apparatus by inserting in a direction through an opening of the main body; and that can be detached from the main body by being pulled out in a detachment direction by way of the opening. The power-requiring unit having a front side toward the insertion direction and an electrode arranged on the front side. A power source having an electrode arranged on its front side and supplies power to the power-requiring unit. An arrangement that detachably fits almost into the opening having an electric conductor. The electric conductor makes electric contact with the electrodes of the power-requiring unit and the power source when the arrangement is fit, and the power-requiring unit can be attached or detached by way of the opening when the arrangement is detached. This is found in all of claims 1-17, but not disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mendelson et al. discloses a detachable power supply apparatus. Mizoguchi discloses a high-voltage unit that is electrically and mechanically connected to the image forming units. Stein discloses a modular telecommunications system.
